

PROFESSIONAL SUMMARY

Mission-driven program manager with a track record of translating complex population health data into systemic improvements across clinical and community settings. Currently managing quality improvement initiatives at Amazon One Medical focused on HEDIS metrics, performance guarantees, and care gap closure across employer-sponsored populations. Formal AI in Healthcare training from Johns Hopkins University combined with an MPH in Population Health Management positions me at the intersection of responsible technology adoption and measurable social impact. Experienced in multi-stakeholder program management, nonprofit partnership building, and communicating technical insights to diverse audiences from clinical leadership to government and NGO partners.

EDUCATION

Master of Public Health – Population Health Management

University of Florida • Gainesville, FL • August 2025 – May 2027 (Expected)

- Relevant Coursework: Regression Methods, Statistical Programming (R), Patient Safety & Quality Improvement, Designing Public Health Solutions, Health Systems Evaluation & Improvement, Public Health Leadership

Bachelor of Arts – Public Health, Global Health Focus

University of Washington • Seattle, WA • September 2021 – June 2024

- Dean's List; ASUW Senate. Research: Cholera in Yemen, TB in Iran, Malaria Prevention in Nigeria, UW qualitative studies

CERTIFICATIONS

- Artificial Intelligence in Healthcare – Johns Hopkins University (2025): AI in Population Health, AI on Cloud, AI for Intelligent Decision Support, AI Business Strategy for Healthcare
- Basic Certificate in Quality and Safety – Institute for Healthcare Improvement (2025): PDSA Cycles, Run Charts, Control Charts, Human Factors and Safety

CORE COMPETENCIES

Program & Portfolio Management • AI Applications in Health & Social Impact • Grant Management & Impact Evaluation • Multi-Stakeholder Convening • Nonprofit Sector Collaboration • Population Health Analytics (HEDIS, NCQA) • Data Visualization (Power BI, Excel) • Statistical Analysis (R, SPSS) • Health Equity & Community Health • PDSA / Lean / IHI Methodologies • Cross-functional Team Leadership • Executive Communication

PROFESSIONAL EXPERIENCE

Quality Improvement Program Manager

Amazon One Medical, Employer Programs • Seattle, WA • April 2026 – Present

- Manage a portfolio of quality improvement initiatives across employer-sponsored populations, tracking HEDIS metrics and performance guarantees against NCQA benchmarks to identify systemic care gaps and drive measurable health outcomes.
- Lead cross-functional workstreams involving clinical, operations, and analytics stakeholders to design evidence-based interventions, translating complex population health data into actionable strategies for leadership.
- Develop performance dashboards and reporting infrastructure used by program leadership to evaluate impact of QI initiatives and inform strategic investment decisions across the Employer Programs portfolio.
- Coordinate multi-stakeholder program logistics for concurrent QI projects, ensuring alignment with federal quality standards, payer requirements, and organizational performance guarantee commitments.
- Serve as subject matter expert on clinical quality metrics, bridging the gap between technical health data systems and operational partners to accelerate responsible, evidence-based improvement adoption.

Quality Improvement Coordinator

HealthPoint Community Health Center • Kent, WA • February 2025 – April 2026

- Managed and analyzed quality performance metrics (HEDIS, preventive care, chronic disease, immunizations) to identify system-level risks and design targeted care gap closure interventions across a federally qualified health center.
- Led data-informed QI initiatives using Lean and IHI methodologies including PDSA cycles, improving clinical reliability and patient outcomes for underserved communities aligned with health equity goals.
- Built and maintained dashboards and reports for Population Health, QI, and clinic leadership; translated complex data findings into actionable recommendations presented at senior leadership forums.
- Coordinated equity-focused patient safety initiatives integrating patient voice and community feedback, managing multiple concurrent projects under tight deadlines in alignment with federal and payer quality standards.

- Collaborated cross-functionally with providers, care coordinators, and operations leaders to standardize clinical workflows and reduce variation, directly supporting measurable improvements in population health outcomes.

Program Manager (MSA Coordinator)

University of Washington Muslim Student Association • Seattle, WA • October 2023 – July 2024

- Secured and managed up to \$70,000 in funding for community programs and campus outreach, overseeing full grant lifecycle from application through impact evaluation and reporting.
- Designed and executed community health and wellness programs averaging 200–300 attendees, leading cross-functional teams of officers and volunteers through full program management cycles.

Human Rights Intern

United Nations Population Fund (UNFPA) • Rabat, Morocco • September – October 2023

- Orchestrated community-based initiatives for youth empowerment and health education in partnership with local NGOs and the Y-Peer network, developing direct experience in nonprofit stakeholder coordination and convening.
- Synthesized field data to support program recommendations and system improvements presented to government and NGO partners, translating research into actionable policy and programmatic guidance.
- Conducted health policy research on women's health, youth education, and community-based interventions, managing outreach initiatives across multidisciplinary teams under compressed timelines.

Public Health Research Assistant

Architectural Building Inspections, Inc. • Seattle, WA • June – September 2023

- Conducted public health and safety compliance assessments aligned with OSHA standards, analyzing inspection data in R to identify risk trends and inform mitigation strategies.
- Produced technical reports supporting risk reduction and regulatory compliance, contributing to \$1M+ in litigation settlements through clear translation of complex safety findings for legal stakeholders.
